USER PAGE

Name: (edit)

Email: (edit)

Date created: (edit)

GROUP PAGE

Data in group:

- **Group id**
- **Group name**
- **Group members**
- **Date created**
- **Movies_watched**   this should be another struct?
- **System id**   if we choose to save system in another table, or just include all here.

Group info:
  Group name: ...
  Group id: ...
  Group members: ...

System status:
  Not started / Add movies / Picking movies
  Create system / Visit system

Movies watched:

Movie info	Date watched	Ranking
...	...	...

SYSTEM PAGE

Data in system:

- System id   if system is stored in another table
- Status   either: NOT_STARTED | ADDING_MOVIES | PICKING MOVIES
- Added movies   include: movie_info, added_by, date_added
- Deadlines   ?
- Turn   Option<member>

Adding movies

Home/Logo   Login   Register   My Groups   UserPage (Account)

Group info:
     Group name: ...
     Group id: ...
     Group members: ...

System status:
     Not started / **Adding movies** / Picking movies

Add movies

imdb search

added by you:

delete?	movie name & link	date added	watched by someone else
☐	...	...	...

Add movie deadline: ....

submit movies

added by others:

add by	movie name & link	date added	watched
...	...	...	☐
